EDUCATION

Bachelors Degree in Software Engineering

National University of Computer and Emerging Sciences | FAST

Aug 2022 - Jun 2026

Islamabad, Pakistan

PROFESSIONAL EXPERIENCE

Automation Engineer

FRACK Technologies

Jun 2025 - Dec 2025

Islamabad, Pakistan

- Automated a lead generation pipeline that sourced 60+ clients for brand development services.
- Collaborated on building an aviation marketplace enabling Transworld Aviation to buy, sell and auction parts online.

Software Developer Intern

DijitalBrains

Jul 2024 - Aug 2024

Faisalabad, Pakistan

- Worked in a client-facing full-stack team engineering web applications for US based clients.

PROJECTS

LaunchMind 🔄 Python | GitHub API | Slack API | Prompt Engineering | Render | Vercel

- Reduced idea-to-delivery time to under 90 seconds by orchestrating a 5-agent autonomous pipeline.
- Turned specs into a landing page by implementing an Engineer Agent with automated GitHub commits.
- Cut revision cycles by 40% by designing a self-correcting QA Agent that re-triggers underperforming agents.
- Achieved 99% uptime by deploying the React frontend on Vercel and the FastAPI backend on Render.

Codely 🔄 Next.js | Groq SDK | Prisma | Monaco Editor | Vercel

- Generated unique coding problems in under 4 seconds by building a Llama 3.3 70B pipeline across 3 difficulty tiers.
- Evaluated submissions across 5 criteria in one LLM call by building a scoring engine with complexity analysis.
- Prevented solution leakage in 100% of hint requests by designing dual mode hints with prompt-level guardrails.
- Shipped full-stack to Vercel with under 2s cold starts by wiring 6 serverless routes to Groq, Supabase, and Clerk.

MondAI n8n | MCP | Anthropic | GraphQL | Prompt Engineering

- Executed Monday.com board actions in under 3 seconds by building an NL-to-GraphQL agent over MCP.
- Lowered board onboarding time to under 2 minutes by automating manual column configuration entirely.
- Automated 7+ board operations conversationally by designing a prompt-engineered agent with error recovery.
- Reduced failed API calls by 68% by batching all board operations into one validated GraphQL mutation.

StaffSync n8n | Workflow Automation | Slack API | Supabase | Cron Scheduling

- Lowered HR admin overhead by 91% by building a natural language Slack agent for attendance automation.
- Reduced unchecked-out sessions by 63% by engineering a cron-based agent with employee auto-checkout.
- Cut manual routing for 50+ monthly requests by building a webhook-triggered agent across 8 departments.
- Delivered salary slips to employees in under 60 seconds by automating payroll calculations and Slack delivery.

HONORS & AWARDS

Full Bright Scholarship (Punjab Group of Colleges)

CERTIFICATIONS

AWS Cloud Quest: Cloud Practitioner

AWS Cloud Web Application Builder

English for Career Excellence (Sponsored by US State Department)

LEADERSHIP

Teaching Assistant for 120+ Students at FAST University

Lead PR and Marketing at FAST Software Engineering Society

TECHNICAL SKILLS

Languages: Python, TypeScript, JavaScript

AI & Automation: LangChain, LangGraph, LangSmith, CrewAI, n8n, MCP, Webhook Integration

Generative AI: RAG, Prompt Engineering, Context Engineering, FAISS, Pinecone, Chroma

Cloud & DevOps: AWS, Docker, Redis, GitHub Actions, CI/CD, Render, Vercel

Web & Databases: FastAPI, Next.js, PostgreSQL, MongoDB, Supabase
